Dartie - Just in Case!

Dartie is a handmade Leather Flap Dart Case / Dart Sheath for storing your darts and dart accessories. It holds one complete fully assembled, ready to play, sets of darts. A Dartie has one small and three larger pockets for your extra flights and shafts and three channels, one for each dart. This type of dart case has been very popular in Sweden for many years.

You can attach the Dartie very easily to your belt using the push-button or just stick it down your front or back pocket.

During a game you can also mark your bottle with the leather-string around the neck of the bottle. The string also has a brass metal-hook which makes it easy to mark your beer or tin.

When you are travelling you want your darts to take as little space as possible. Just take apart your darts and store shafts and flights in one of the three pockets. Just a small part of the dart-bodies will be visible and you have a very compact Dartie.

Available in black, light blue, dark brown, dark green and red.
